Principal services provided by the Association:

Financial assistance for medical treatments

Members facing financial difficulties that require assistance in paying for their medical needs are eligible for assistance via grants and/or interest-free loans linked to the Index. Every year, the Fund helps thousands of members in financing medication, medical devices, dental maintenance treatment, child development treatment, psychological treatment, assistance to para-medical treatments for autistic children and somatic problems, and more.

Loans to Members

We at Keren Maccabi understand that unexpected medical expenses may cause great difficulties in the routine lives and finances of its members, and therefore we offer members of the Fund interest-free loans linked to the Index for coverage of medical treatment costs. The loan sum is limited to a ceiling that is updated from time to time by the Fund's Loans Committee.

Scholarships for medical students and students of para-medical professions

Keren Maccabi set as its goal to foster the next generation of physicians and therapists. For this purpose, the Fund awards scholarships to members under the age of 29 studying medicine or para-medical professions that are approved by the Fund's Scholarship Committee. Hundreds of scholarships are awarded every year to students. Scholarships are approved by the Scholarship Committee that sets the criteria for awarding scholarships and publishes them every year, prior to the dates set for submission of scholarship applications.

Social Involvement in the Community

Keren Maccabi assists Maccabi Healthcare Services in welfare and social involvement undertakings, and promotes community volunteering programs.

Among the Fund's recent activities:

Assistance to the Call to Reading project that encourages reading books by pediatricians

Assisting in the Warm Wind project in organizing activities

Culture and spirit for Holocaust survivors (in collaboration with Eshel Associations and the Ministry of Senior Citizens)

Maccabi Youth Fostering the Future Generation

Keren Maccabi assists in funding the activities of **Maccabi Youths**. This is an innovative program in which about 1,200 youths study and volunteer in dozens of branches and facilities of **Maccabi Healthcare Services**. The program is comprised of enrichment courses provided free of charge to youths, in subjects related to the world of medicine. **Maccabi Youths** experience the challenges of volunteering and contributing to the community, and help in the promotion of a healthy lifestyle in Israel. The project includes reading books to underprivileged children in various areas throughout the country, while encouraging reading and cultural activities among youths. The project promotes reading of books, and emphasizes the importance and link between reading & education and children's health.
